

EXPERIENCE

Sysblok | HEAD OF ENGINEERING (PRO BONO)

Since November 2023 | [LinkedIn page](#) | [sysblok.ru \(in Russian\)](#)

- Leading the engineering team of 4 for a non-profit media with 170k subscribers;
- Directing the development of the website (80k MAU) and internal tooling for editorial workflows;
- Sourcing the engineering backlog from the editorial board requests;
- Integrated AI tools into engineering and editorial workflows, enabling non-technical staff to automate routine tasks;
- Managed HR pipeline and technical interviewing, growing the team to 4 engineers through 30+ interviews.

onFabric | FOUNDING ENGINEER

August 2025 – April 2026 | [onfabric.io](#) | [context-use.com](#)

- Built the core ETL layer for context-use, normalising Instagram, Google, ChatGPT and Telegram exports into structured, searchable AI memory objects;
- Designed the pipeline for extensibility across new data sources, enrichment steps and agent-facing retrieval use cases; added semantic enrichment via Gemini batch embeddings, multimodal asset descriptions and a search API;
- Reworked Meta data ingestion from Lambda into FastAPI/ECS pipeline with idempotent GCS-backed staged processing, ZIP batching and BDD coverage;
- Owned internal Streamlit tools and multi-cloud infrastructure (AWS + GCP) in Terraform: ECS, RDS, GCS, Vertex AI, Cloud Run, CloudWatch and IAM/OIDC.

Lerno | SENIOR SOFTWARE ENGINEER, CONTRACT / PART-TIME

May 2025 – December 2025 | [lerno.ai](#)

- Built a streaming agent over meeting transcripts using LangGraph;
- Migrated the AWS infrastructure to Terraform for SOC2 compliance readiness.

Meta | SENIOR SOFTWARE ENGINEER

February 2020 – August 2024 | Hack(PHP), Java, React | London, UK

- Led the reliability workstream (6 people) on [Data Transfer Project \(DTP\)](#);
- Achieved a 10x drop in DTP failure rate and overhauled the monitoring pipeline;
- Implemented several features in [Spark AR Hub](#) Insights UI and data pipeline;
- Mentored new people on the teams, conducted 100+ interviews.

July 2019 – October 2019 (internship) | Python2/3, C++14, MySQL | London, UK

- Designed and implemented a snapshot extension for Mercurial ([Github repo](#)).

SELECTED PROJECTS

Wächter Bot | TELEGRAM BOT FOR COMMUNITY MANAGEMENT

Since August 2023 | Python | [Bot](#) (in Russian), [repo](#)

- Leading a team of 3 for the growing product (500+ Telegram groups, 20k users);
- Overhauled the product via user feedback, better architecture and monitoring.

COMMON | HELPING REFUGEES TO LEARN LANGUAGES

April 2022 – January 2023 | Python | [cmoncmon.co](#), [repo](#)

- Developed a Telegram bot for refugee students and volunteer teachers;
- The bot facilitated onboarding and learning for 2.8k students and 1k teachers.

EDUCATION

MOSCOW INSTITUTE OF PHYSICS & TECHNOLOGY

BSC IN APPLIED MATHEMATICS & COMPUTER SCIENCE

Grad. July 2017 | Moscow, Russia

TALKS

May 2026 [Claude Code Central London](#)

March 2026 [AI Tinkerers London](#)

RECOGNITIONS

January 2025 [ConnectHack](#), 2nd prize

March 2023 [Tech Nation](#), UK Global Talent

SKILLS

HARD

Recent experience:

• AI Tools (Cursor, Claude) • APIs (REST, GraphQL) • **AWS** • Celery • CI/CD • DevOps • Docker • FastAPI • GCP • Gemini API • Git • LangChain • NodeJS • OpenTelemetry • PostgreSQL • Pytest • **Python** • Redis • **Terraform** • Typescript • Unix

SOFT

• Agility • Collaboration • Empathy • Learning • Interviewing • Mentoring • Passion • Project Management • Strategic Reasoning

LANGUAGES

• Russian (native) • English (fluent) • French (intermediate, DELF B1 diploma, participant of All-Russian Olympiad Finals)

INTERESTS

VOLUNTEERING

Contributed to multiple volunteer projects, both as a Software Engineer and as a helpline support operator.

TEACHING

7 years of teaching experience. Taught Mathematics and Computer Science to high school and undergraduate students. Organized dozens of school-level Math and Physics competitions, including solution review and event coordination.
